Hi Eric,

What I use for my downlink receiver is a Radio Shack HT-100. I've seen them  
at flea markets for \$125, and I think you could talk someone down to \$100.

If you build a direct conversion receiver, I think a lot of us here would be  
interested in you results. I've tried in vain to find any sort of plan for  
building a 2m CW/SSB transmitter.

Good luck....Keith - KA1RH0
